DETAILED ACTION

Priority

1. Receipt is acknowledged of papers submitted under 35 U.S.C. 119(a)-(d), which papers have been placed of record in the file.

Allowable Subject Matter

2. Claims 1-3 are allowed.
3. The following is an examiner's statement of reasons for allowance: The prior art of record neither suggest nor renders obvious the instant combination in an optical disc drive apparatus, comprising: a frame provided in a cabinet and having a sidewall; and a disc tray supported by the frame; a supporting portion provided in the sidewall of the frame and a supported portion provided at a side edge of the disc tray, the supporting portion includes a guide rib formed protruding from an inner wall surface of the sidewall toward a center portion of the disc drive apparatus, and a plurality of guide protrusions formed protruding upward from the guide rib in a front-to-rear direction of the guide rib, the supported portion has a guide groove slidably engaging to the plurality of guide protrusions on a lower face side of the disc tray, a guide protrusion positioned at forefront among the plurality of guide protrusions is structured so as to come in surface-contact with a wall surface implementing the guide groove, and a root portion of the guide protrusion has a width increasing solely toward the center portion of the disc drive apparatus with respect to its tip end portion as set forth in independent claim 1.

The prior art of record neither suggest nor renders obvious the instant combination in an optical disc drive apparatus, comprising: a box-shaped cabinet having an opening in a front face; a frame provided in the cabinet and having a sidewall; and a disc tray supported by the frame; a supporting portion provided in the sidewall of the frame to a supported portion provided at a side edge of the disc tray, the supporting portion includes a guide rib formed protruding from an inner wall surface of the sidewall toward a center portion of the disc drive apparatus, and a plurality of guide protrusions formed protruding upward from the guide rib in a front-to-rear direction of the guide rib, the supported portion has a guide groove slidably engaging to the plurality of guide protrusions on a lower face side of the disc tray, and a guide protrusion positioned at forefront among the plurality of guide protrusions is structured so as to come in surface-contact with a wall surface implementing the guide groove as set forth in independent claim 2.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
